This reference relates to a dental composition comprised of a silicone crosslinkable and/or polymerizable by cationic process, an efficient amount of at least an initiator such as an organometallic complex borate, and a dental filler present in the composition in a proportion of at least 10 wt. % relative to the composition total weight. The dental compositions are useful for making dental prostheses or for dental restoration.

Applicants respectfully request that these references be made of record in the above-identified application and considered by the Examiner during prosecution of the application.

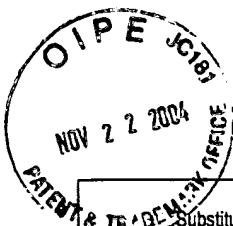

It is respectfully submitted that the present invention as claimed is patentable over the listed references.

This information disclosure statement is being filed within three months of the filing date of a national application other than a continued prosecution application under § 1.53(d) or before the mailing of a first Office Action on the merits. Accordingly, no fee is due.

Acknowledgment of receipt is respectfully requested.

Respectfully submitted,
